

## OPALE MATTRESS

### **Height**

26cm

### **Top Coating**

Fabric: Polyester microfibre

Padding: Polyester microfibre

### **Technology**

Standard box

Reinforcement perimeter structure ideal to allow the springs to always function perpendicular to the resting plane.

Next spring system

This system features springs enclosed in individual pockets and assembled in an arrangement of seven different areas in terms of spring density: higher where more support is needed and lower in other areas. The Next spring system distributes the pressure of the body on the mattress evenly, giving superior ergonomics and ensuring high-quality sleep night after night.
